

## Project Description

### Members: Brendan (Solo)

My app is called Recess. It's an app to help people find pickup games/leagues, connect with teammates, and view their stats. Users will be able to login (with email or Facebook), create leagues/games with full CRUD, and message other players (stretch).

MVP: Full CRUD for both league and games.

Stretch: Stats, posts/comments

### Models

- Leagues:
  - Name
  - Manager
  - Location (<https://github.com/caioariede/django-location-field>)
  - Sport
- Games:
  - Name
  - Location
  - Date
  - Info
  - Image (upload)
  - League (foreign key)
- Posts
  - Author
  - Body
  - Timestamp
  - Games (foreign key)
- Comments (Replies)
  - Author
